BETA 2: 19th of July 2020

Changelog:

Code to PDF Conversion

Weather Widget is now working

Initial Language Support, Spanish and Russian added

Fixed Calendar and Notes input color in dark mode

Better RSS Feed with scrollable pagination

Added Daylight Widget (Toggles daytime / nighttime, need to enable manually and enter coordinates)

Added small Moon Widget

Added Music Visualizer EXtra

NEW: Added a guide to switch the font to SF Display Pro

Calendar Widget now shows Month and Year

Misc Fixes

To anyone asking for Spotify album art support - It can't be done reasonably. Blame spotify for messing up their app.
